EDUCATION

Eskişehir Technical Universtiy

Computer Engineering
2020 - 2025

Current GPA : 3.40

SKILLS

- Java
- Spring Boot
- React
- JavaScript
- Docker
- MySQL , PostgreSQL
- MongoDB

LANGUAGES

- English
- Turkish
- German

ABOUT ME

As a penultimate year computer engineering student, I'm driven by a deep passion for software development, fueled by a strong foundation in both front-end and back-end technologies. Driven by a thirst for knowledge and a collaborative spirit, I'm fluent in English and thrive in team environments. I'm eager to contribute my skills and passion to an innovative software development projects , where I can continuously learn and grow alongside a team of talented professionals.

PROJECTS

GYM MANAGEMENT SYSTEM

- Designed responsive, user-friendly interface with HTML/CSS for member management, equipment monitoring, and data visualization.
- Developed secure Spring Boot application with JWT authentication and MySQL database.
- Implemented REST API for front-end communication, machine usage monitoring , and advanced member management with payment processing and data export.
- Streamlined data management (CRUD) with Spring Data JPA.

Personal Health and Activity Tracking App

- Led the design and development of a user-friendly personal health app, utilizing React for a smooth interface and Spring Boot for robust backend.
- Implemented technologies like JWT for secure user authentication.
- Created a system that empowers users to track health data, visualize progress, and receive personalized health and exercise recommendations.
