EĞİTİM

Eskişehir Technical Universtiy

Computer Engineering
2020 - 2025

Current GPA :3.43

BECERİLER

- Python - Django, Flask
- Java - Spring Boot
- HTML , CSS
- JavaScript - React, Node.js, Express
- SQL - MySQL, PostgreSQL
- NoSQL - MongoDB

DİLLER

- English
- Turkish

HAKKIMDA

As an undergraduate Computer Engineering student, I have a strong grasp of backend development, including Python, Java, and Node.js, and have a good understanding of SQL databases and RESTful APIs. I understand the value of full-stack knowledge and am committed to writing clean, efficient code. I am always ready to face new challenges, learn, and make meaningful contributions to any team.

İŞ GEÇMİŞİ

FREELANCE WEB DEVELOPER

BiOnluk
Jan 2023-

- Interacting with clients to gather and define specific frontend requirements
- Translating client requirements into intuitive user interfaces using technologies such as HTML, CSS, and JavaScript
- Conducting user acceptance testing and making adjustments based on feedback to ensure the product met the clients' expectations
- Continually learning and applying new frontend technologies and best practices to improve user experience and customer satisfaction.
